

# CONNECT EDITION CONFIGURATION v10.15.02 FLOW DIAGRAM

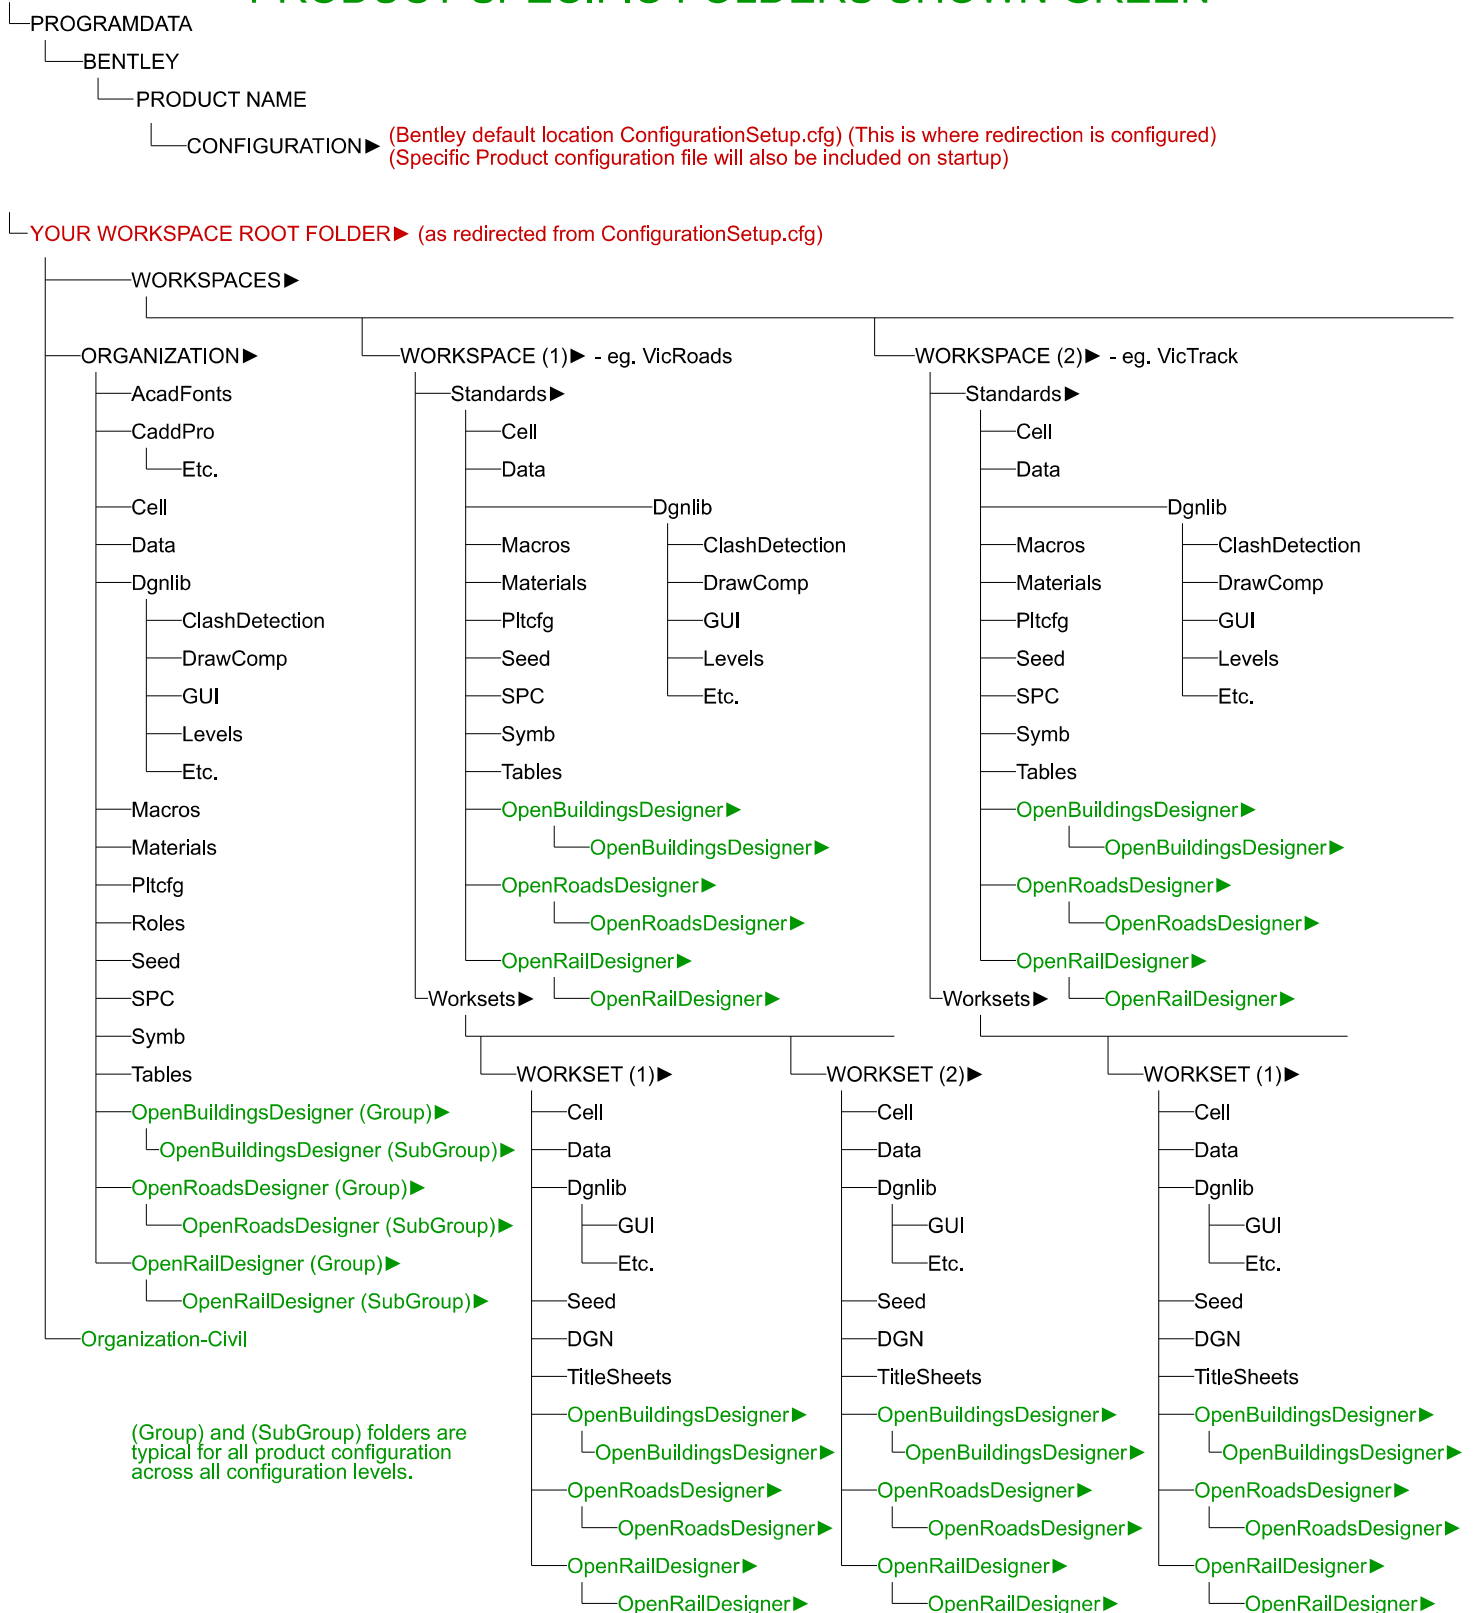

## PRODUCT SPECIFIC CONFIGURATION SHOWN GREEN

### OTHER CONFIGURATION IS FOR CORE MICROSTATION COMPONENTS

# EXAMPLE ONE CONFIGURATION FOLDERS INCLUDING REDIRECTION TO ANOTHER LOCATION FOR ALL CONNECT EDITION PRODUCTS

## PRODUCT SPECIFIC FOLDERS SHOWN GREEN

All .cfg files within the folders marked with ▶ will automatically be processed on startup via msconfig.cfg.

The ProductName folders will contain the Product specific configuration files, and Folders that only hold information relevant to the specific Product.

Workspace and Workset folders could be located in other locations with relevant redirection included in configuration.

The folders required in all these areas will depend on what is required for each company or standard specifications and may be different to what is shown here, but this shows a typical folder structure.
